 Attorney for Applicant(s)

**REQUEST FOR CERTIFICATE OF CORRECTION
 PURSUANT TO 37 C.F.R. § 1.322**

Certificate of Correction Branch
 Commissioner for Patents
 Post Office Box 1450
 Alexandria, VA 22313-1450

Dear Sir:

Transmitted herewith is a Certificate of Correction for United States Patent 7,061,993 B2 issued June 13, 2006. Upon reviewing the patent, the following errors were noted and should be corrected as follows:

On the FACE PAGE:

Under FOREIGN PATENT DOCUMENTS, column 2, line 1, after "11/1990" insert --H04B 01/06--.

FEB 15 2007

In the CLAIMS:

Claim 5, column 11, line 49, delete "couple to said" and insert --coupled to a --.

Claim 7, column 11, line 56, after "said" insert --set of--.

Claim 8, column 11, line 59, delete "instruction" and insert --instructions--.

Claim 10, column 12, line 1, delete "source;" and insert --source,--.

Claim 15, column 12, line 37, delete "recieved" and insert --received--.

Claim 19, column 12, line 59, delete "low noise amplification" and insert --Low Noise Amplifier--.

The Certificate of Correction sets forth these corrections.

Remarks

A review of these documents confirms that the errors were made in the printing of the patent. Please see Exhibit "A", page 1 of 1 from the List of References Cited by the Examiner (9/15/2005), entry 1 under Foreign Patent Documents for the correction to the face page. Please see Exhibit "B", pages 3-5, and 7 of Amendment A filed with the USPTO on December 15, 2005, for the following corrections:

Claim 5, see page 3, claim 7, line 3.

Claim 7, see page 3, claim 9, line 5.

FEB 15 2007

Claim 8, see page 4, claim 10, line 2.

Claim 10, see page 4, claim 12, line 4.

Claim 15, see page 5, claim 19, line 3.

Claim 19, see page 7, claim 25, line 2.

Since these errors for which a Certificate of Correction is requested are a result of the United States Patent and Trademark Office mistake, no fee is due (35 U.S.C. § 254). Please charge any deficiency or overpayment in fees to Deposit Account 06-1135.

Respectfully submitted,

FITCH, EVEN, TABIN & FLANNERY

App. No. 09/942,360
Amendment A
Page 3

Claim 3 (Currently amended): The method according to Claim 1, wherein electronics coupled to an output of said front end require a minimum signal strength in order to process the signal received at the antenna, and wherein said predetermined threshold comprises said a minimum signal strength capable of being processed by electronics coupled to an output of said front end less a strength of amplification by an Low Noise Amplifier (LNA) of said front end.

Claim 4 (Original): The method according to Claim 1, further comprising the step of:

powering down said amplifier if the amplifier is powered up and the received signal strength is greater than said threshold.

Claims 5-6 (Canceled)

Claim 7 (Currently amended): The method according to Claim 1, wherein said minimum recognizable signal strength is a weakest signal capable of being processed by electronics coupled to a mixer output.

Claim 8 (Currently amended): The method according to Claim 1, wherein said minimum recognizable signal strength is -106 dBm.

Claim 9 (Previously presented): The method according to Claim 1, wherein:

said method is embodied in a set of computer instructions stored on a computer readable media;
said set of computer instructions, when loaded into a

computer, cause the computer to perform the steps of said method.

Claim 10 (Previously presented): The method according to Claim 9, wherein said set of computer instruction are compiled computer instructions stored as an executable program on said computer readable media.

Claim 11 (Original): The method according to Claim 1, wherein said method is embodied in a set of computer readable instructions stored in an electronic signal.

Claim 12 (Currently amended): A front end architecture, comprising:

a Low Noise Amplifier (LNA) having an LNA input and an LNA output, said LNA input coupled to a signal source, wherein the signal source corresponds to a signal received at an antenna;

a filter having an input coupled to the LNA output and a filter output;

an radio frequency (RF) amplifier having an RF amplifier input coupled to the filter output and an RF amplifier output;

a first bypass circuit coupled between the input of the filter and the RF amplifier output and configured to bypass the filter and RF amplifier; ~~and~~

a control device configured to activate and deactivate the first bypass circuit; and

a second bypass circuit coupled between the LNA input and the LNA output;

wherein said control circuit is further configured to activate and deactivate the second bypass circuit;

wherein the second bypass circuit is activated if the

Amendment A
Page 5

received signal strength (RSS) of a received signal is greater than a first threshold, and the first bypass circuit is activated if the received signal strength (RSS) exceeds a second threshold higher than the first threshold.

Claim 13 (Previously presented): The front end according to Claim 12, wherein the first bypass circuit comprises a switch coupled between the input of the filter and the radio frequency (RF) amplifier output.

Claim 14 (Previously presented): The front end according to Claim 13, wherein said switch is a Single Pole Single Throw.

Claim 15 (Original): The front end according to claim 13, wherein said switch is a transistor.

Claim 16 (Previously presented): The front end according to Claim 12, further comprising:

a signal detector coupled to said signal source and configured to determine a received signal strength (RSS) of a signal from said signal source;

wherein said control device is further configured to activate and deactivate the first bypass circuit according to the RSS of the signal from said signal source.

Claims 17-18 (Canceled)

Claim 19 (Currently amended): The front end architecture according to Claim ~~12~~ 18, wherein the first bypass circuit is activated if a received signal strength (RSS) of a received

Claim 22, further comprising:

a means for low noise amplification (LNA) coupled to a
signal source;

a filter means coupled to an output of the LNA; and

an amplifier means coupled to an output of the filter means;

wherein said means for bypassing is coupled to an input of
the filter means and an output of the amplifier means.

UNITED STATES PATENT AND TRADEMARK OFFICE CERTIFICATE OF CORRECTION

PATENT NO. : 7,061,993 B2
APPLICATION NO.: 09/942,360
DATED : June 13, 2006
INVENTOR(S) : Wieck

It is certified that an error appears or errors appear in the above-identified patent and that said Letters Patent is hereby corrected as shown below:

On the FACE PAGE:

Under FOREIGN PATENT DOCUMENTS, column 2, line 1, after "11/1990" insert —H04B 01/06--.

In the CLAIMS:

Claim 5, column 11, line 49, delete "couple to said" and insert —coupled to a --.

Claim 7, column 11, line 56, after "said" insert --set of--.

Claim 8, column 11, line 59, delete "instruction" and insert —instructions--.

Claim 10, column 12, line 1, delete "source;" and insert —source,--.

Claim 15, column 12, line 37, delete "recieved" and insert —received--.

Claim 19, column 12, line 59, delete "low noise amplification" and insert —Low Noise Amplifier--.
